

20" MINER-STYLE CRAWLER

- Heavy duty final drive
- Planetary reducer mounted within frame for protection, and equipped with removable drive gear to provide true “free-wheeling” capability
- Forged 20” pads designed to allow end user to only stock one type of replacement pad
- Reducer and drive sprocket are removable with little disassembly required
- Heavy duty sealed bearing idler with integrated cylinder operated take-up that locks in place with mechanical shims
- Dual tooth drive sprocket splits load and increases sprocket life
