

DEWATERING SYSTEM

Under Drum Unit (Patent No. US8,147,689 B1)

- Fully customizable systems to fit production needs
- Rail, crawler, or stationary configurations
- Under drum configuration prevents multiple levels of product handling and reduces pit area clean up
- Blow out spill containment that eliminates potentially dangerous exposure to personnel
- Heavy duty conveyor decking with CCO throughout
- Corrosive resistant galvanized frame
- Customizable heavy duty screens throughout
- Variable Frequency Drive options
- Moisture content and product sizing reduced to manageable levels for easy transport
